Election/Restrictions

1. Claims 1-36 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected species, there being no allowable generic or linking claim. Election was made **without** traverse in Paper No. 010504.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use, or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 37 and 38 are rejected under 35 U.S.C. 102(b) as being anticipated by Boucher (U.S. Patent No. 3,926,556) or Copa et al (U.S. Patent No. 4,266,747).

Boucher teaches a method of treating materials as a microdispersion wherein the device includes an emitter **39** for producing an energetic emission, an exposure region (unlabeled region below lamps **39**), and a droplet formation device **32**. See Figure 7 and col.13, line 49- col.14, line 14. Boucher discloses that the droplets are 1-100 μm (col.13, line 54). A collection chamber **35** is positioned at the outlet of the exposure region to collect the fallen droplets. Copa et al teaches a method of treating a liquid material with a microdispersion treatment device including an emitter **10**, an exposure region **4**, and a droplet formation device (unlabeled nozzles shown spraying fluid **1**). See Figure 4 and col.4, lines 20-39.
